Who we are?

Global Security Systems W.L.L is a market leader for total safety and security solutions integration in Kuwait as well as other Middle East countries. Our parent company is established in 1972, the relentless endeavors in catering the market with leading edge security solutions have created strong demand for our solutions and long term relationships with our valuable clients. We believe in providing a cost effective solution to our customers while ensuring a high quality of service and products that we provide. With our technically innovative solutions and genuine integration we maintain a unique reputation in the market.

We have world renowned manufactures to supply us with leading edge technology and systems. We are registered with highly reputed clients in their qualified list of contractors for their regular tendering purpose, the list of our clients include Ministries, Oil sectors, Business Malls, Hospitals Banks and Major establishments in public as well as private sectors.

What we do?

We explore, define, design and implement the advanced leading edge security solutions in the Middle East market. We serve many vertical clients, in each area our advanced technology solution knowledge helps our customers to employ industry best technologies and practices.

To ensure efficiency and maintainability we offer our engineering experience, proven standards and project methodology. Our offerings span advanced technology solutions ranging from Home Automation, CCTV, Access Control, Alarm systems, Parking system, Queue Management System, Public address system, Display System, Telephone System(PABX), SMATV System, Networking, Environmental Protection and Nurse Calling System, Central Clock system, Fire Alarm, Intercom & Structural Cabling.

We are specialized in?

- ✓ Planning, Survey & Designing
- ✓ Project Costing & Supervision
- ✓ Implementation and Provide Solutions
- ✓ Integration, Installation & Maintenance
- ✓ System integration for IP networks and Security Systems
- ✓ Testing and commissioning, Training
- ✓ Leading edge technologies and solutions

How do we work?

We have a great team of people who believe in and live by our vision; our unique work culture fosters excellence and innovation. The things we hold highest interest is commitment, accountability and dedication.

Effective project management is key to our record of success in project implementation. Each job is assigned a lead project engineer who provides:

- A single point of client contact
- Milestone tracking and schedule maintenance
- Periodic status reporting
- Meeting documentation
- Hours and expense monitoring
- Resource co ordination
- Project invoicing

Quality and excellence are given an extreme priority at each stage of our work; we follow our refined methodology to make sure our customer imaginations are turned in to reality with 100% accuracy.

Survey & Assessment:

At the survey stage our professionals evaluate the customer needs in detail and define the goals that are to be achieved from the implementation.

Design:

Based on our extensive knowledge of multiple security solution we define a comprehensive design which suffices our customer needs.

Scope Definition:

At this stage we define a phase by phase project deliverables detailing the technical components, schedules and requirements etc.

Approval:

We make sure customer approve the final scope document prior to the implementation stage.

Implementation:

Once the scope document is finalized and the contract is signed we initiate the implementation stage, our project managers will take the end to end responsibility of the projects to meet the dead line and the quality aspects.

Testing:

At this stage we make sure that the project meets all technical specifications and features in line with the customer requirement.

Handover and Training:

Once the installation works are completed in all respects, the final process of commissioning of the project will be done by the GSS Engineers in presence of the representative from the client.

There after the systems will be properly handed over by Global Security Systems W.L.L to the client by mutually signing a “Handover Certificate” for record.

On-going support:

We extend our ongoing support by phone, E-mails and onsite visits when necessary. To ensure a highly efficient operation and customer satisfaction we possess;

- ❑ Experienced call centre professionals deliver 24/7, 365-day response
- ❑ On-site service with emergency call escalation
- ❑ Preventative maintenance, internal repair
- ❑ Software support, product training & support
- ❑ Expert servicing of all major manufacturers of financial & security equipment
- ❑ Responsive service with 15 experienced technicians

Continued maintenance on a security system becomes very important as this will maximize the investment and enable your system to provide the best possible efficiency. We are fully equipped to maintain and repair system despite age and condition. After each maintenance visit a full report would be compiled indicating all the checks and repairs carried out on the system. All chargeable items would be agreed prior to any work being carried out to avoid any hidden cost.

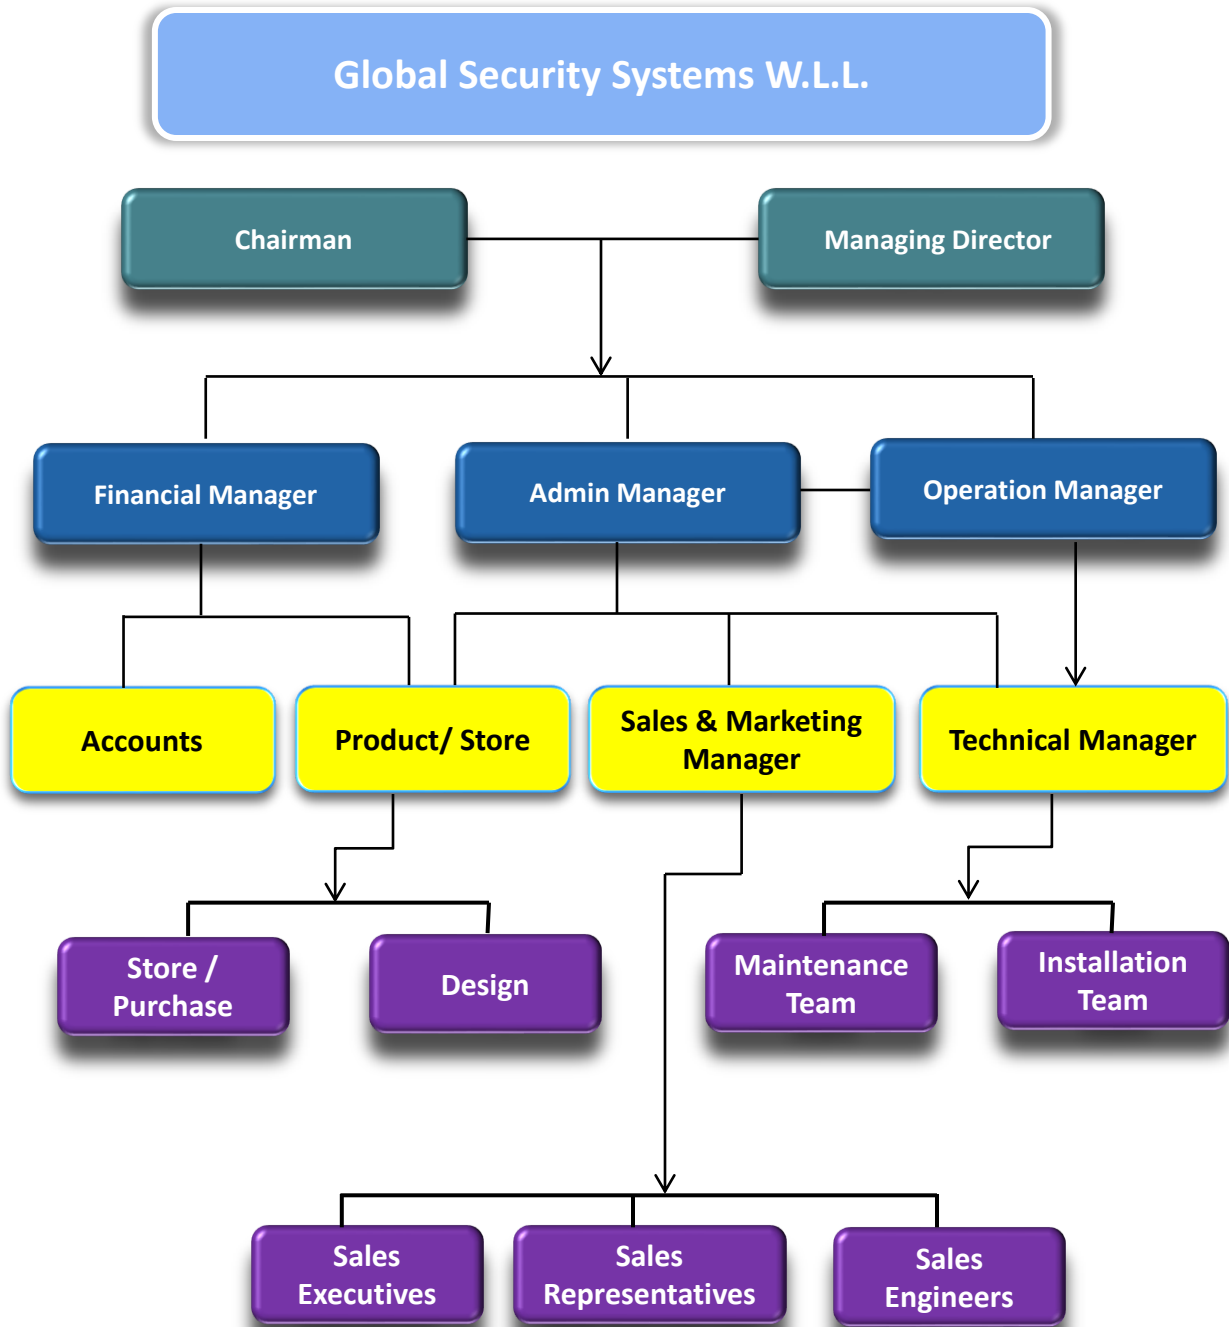

Some of the maintenance service that we can provide:

- ❖ Pay as you go system maintenance
- ❖ Service any system despite the age and condition
- ❖ Comprehensive parts and labour package
- ❖ Comprehensive labour only package

Our Mission:

To provide customized electronic security solutions and products while consistently exceeding consumer expectations through well defined processes undertaken by a team of committed professionals.
